

Eric Garcia

PhD · Staff ML Engineer

eric.garcia@gmail.com · 727-221-3462 · New York, NY

linkedin.com/in/ericthehuman

ML engineer with a PhD in Signal Processing and 15+ years taking models from concept to production. Deep experience in NLP, causal inference, and behavioral ML; built and scaled systems at Spotify serving hundreds of millions of users. Equally at home scoping a problem with a product team and debugging a pipeline at 3am.

EXPERIENCE

MuffinLabs · Founder & Principal Consultant Jan 2026–Present

AI/ML engineering consultancy. Building production systems (models, pipelines, and infrastructure) for clients who need things that actually work at scale.

Superviber · Side Project Jan 2026–Present

AI orchestration platform coordinating multiple expert agents in parallel deliberation to reach convergent consensus on complex decisions.

Keeper Security · Senior ML Engineer Mar 2025–Jan 2026

Applied VLMs (desktop screenshots) and LLMs (shell commands) to malicious session detection. Used AI-generated synthetic sessions for training data; the product's zero-knowledge architecture precluded access to real user content.

Spotify · Senior ML Engineer Nov 2016–Mar 2024

Led ML systems across two domains: NLP infrastructure to monitor public conversations for support signals, including case routing and emerging-trend detection that reduced support effort and raised CSAT, and a causal inference system identifying behavioral patterns driving long-term retention, followed by interventional studies to move those patterns at scale.

Preact (acq. by Spotify, 2016) · Senior ML Engineer Nov 2012–Oct 2016

Probabilistic models (MAP inference) and NMF algorithms for customer behavior analysis and churn prediction from raw event streams on SaaS platforms.

Grail Inc. · Data Scientist Feb–Oct 2012

Topic modeling, sentiment analysis, information retrieval, and collaborative filtering for a news and entertainment platform.

EDUCATION

University of Washington · PhD, Electrical Engineering 2010

University of Washington · MS, Electrical Engineering 2006

Oregon State University · BS, Computer Engineering 2004
